

# Build your farm website in 90 minutes

## Module 5: building out your online store

---

1. Click on the purse button to add the store to your site.
2. Customize your Store page to show the number of items, columns, rows, information desired as well as design
3. Customize your Product page design – every product will have this base page
4. Customize your Cart checkout and Thank you pages.
5. Go to your Store Dashboard, and add your products.
6. When adding products, you can adjust inventory, descriptions, options (weight, color, size, etc)
7. Create your shipping/pickup, tax, and payment options through the Dashboard.
8. Create Collections for each category of products, so that you can select which products show up in your store and/or allow your customers to filter the products by category.
