

Build your farm website in 90 minutes

Module 1: Create your website with Wix

1. Orient to [Wix.com](https://www.wix.com), create a free account.
2. Select "Choose A Template" (not ADI)

Suggested Templates to check out:

- My Organic Garden
 - Farm to Table Venue
 - Fish Supply Store
 - Exotic Pet Shop
 - Halal Food Restaurant
 - The Cafe
3. Save your website – no need to change domain or name yet!
 4. Adjust your background to solid or image, opacity and positioning
 - Use high quality images (preferably from your farm – most newish (<3 years) cell phones take excellent quality images if focused and staged correctly)
 5. Customize your headers and footers
 - Headers and Footers show up on every page
 - In the Header: Farm name and tagline (if you have one), Logo, Menu
 - In the Footer: copyright, your farm name, contact email address, address (if you would like), social links
 - Header and Footer should be consistent with each other (color, transparency, etc)

Design tip! Use the same font and color schemes throughout the website.

Farm name can be different, but all body and header texts should be consistent.
