

# Build your farm website in 90 minutes

## Module 2: Create the 5 essential pages, Optimize for Mobile

---

1. Delete unnecessary pages that came with your template and rename your 5 essential pages, both in menu and in page settings (go to page settings, SEO, and adjust page URL to be consistent with page name)
  - a. Home
  - b. About Us
  - c. Contact Us
  - d. Farm Products
  - e. Shop/Where can you find our products?
    1. If you do the online Wix store, no need – Wix will create it later
    2. If you choose to do offline shopping or link to a farm shopping hub, or list of markets, create the page to tell your customers where to buy.
2. Optimize for mobile - go to each page, and click on the mobile editor (top center left)
  - a. adjust mobile version for easy viewing (can hide items that show up on desktop but do a mobile user nothing but increase load times)
3. SAVE your work!
